DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on September 1, 2009 has been entered. Claims 3-11 are pending. Applicant cancelled claims 1, 2 and 12-15. The previous rejection is withdrawn pursuant to Applicant's September 1, 2009 Amendment.

Claim Rejections - 35 USC § 112

2. Claims 3-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 3, lines 2, 4, "communicatively coupled" is not clear in juxtaposition with the descriptive portion of the specification and drawing figures.

Claim 3, line 8, "a common file structure" is not clear in juxtaposition with the descriptive portion of the specification and drawing figures.

Claim 3, lines 8, 9, "a partner file structure" is not clear in juxtaposition with the descriptive portion of the specification and drawing figures.

Claim 3, lines 10, 11, 13, “write access” is not clear in juxtaposition with the descriptive portion of the specification and drawing figures.

Claim 11, line 2, “read access” is not clear in juxtaposition with the descriptive portion of the specification and drawing figures.

Clarification of the above issues are required.

Claim Rejections - 35 USC § 103

3. Claims 3-11, as understood, are rejected under 35 U.S.C. 103(a) as being unpatentable over Arshad et al., US 6,952,156.

Arshad discloses a transponder, e.g. 20, a database, e.g. col. 5, lines 4-12, storing travel related information. Arshad’s system has read/write access, e.g. Fig. 2. Arshad does not specifically disclose the term communicatively coupled to a transponder reader. However, the antenna, e.g. 32, capacitors, e.g. 34, 36, are coupled together with the transponder. Official Notice is taken that to have communicatively coupled a transponder to a transponder-reader has been common knowledge in the art. To have provided such for Arshad would have been obvious to one of ordinary skill in the art. Similarly, as understood, airline and hotel applications have been common knowledge in the database art. To have provided such for a database of Arshad would appear to have been an obvious choice for one of ordinary skill in the art.
